

Dynasys[®] RFID Animal Care Warehouse Management System Protocol / Census Management

Protocol Management

- Record the basic protocol information such as the title, a short description, expiration and approval dates.
- Track the species, and the USDA Pain Classifications and the number of animals approved for each USDA Pain Class.
- Option to renew protocols.
- Protocols can be transferred to a different investigator
- Reports can be generated by using a number of queries. Drilldowns to the protocol information including animal numbers are available.
- Report displaying protocols expiring within 30, 60 and 90 days.

Census Management

- Generate cage cards using the dynamic cage generation form.
- When cage cards are generated, animals are automatically subtracted from the investigator's protocol.
- Cage card history report details all transactions associated with the cage cards, including check-in and check-out times.
- Ability to search for a cage card based on certain fields such as requisition number or by investigator.
- View a snapshot of investigator's census.
- View the census of any room in the facility.
- Transfer cage cards to different investigator, protocol, cost center, and have the option to subtract animals from the new protocol and/or credit the old protocol back the animals.
- Ability to adjust investigator's "animals used" manually if necessary.

Dynasys® RFID Animal Care Warehouse Management System

Protocol / Census Management

(features continued from page 1)

Emergency Contacts

- Allow labs to record emergency contact information for individuals for each protocol.
- Animal Care staff such as veterinary technicians will have access to this in the event of needing to contact a lab.

Investigator Control Panel

- This function allows the animal care staff to login and select an investigator's account. By doing this, they can see exactly what the investigator or their staff would see when logging on. This allows for easy answers to investigator's questions regarding the system and what they are seeing.

Administrative Functions

- User management (detailed in next section)
- Add/Remove species
- Add/Remove cost centers (for use on cage cards)
- Add/Remove vendors
- Add/Remove Locations

User Management

- Assign access roles to users. All optional modules tie into this user management portion so that it is centrally managed.
- Investigators are granted access to their accounts in this section.
- If requested, investigator's can add their own account users which will only have access to that investigator's account, or it can be configured where the animal care staff must set all access including users of the investigator's account. Investigators may desire additional users be able to use their account such as lab managers and fiscal managers.
- Typical Roles include (but can be customized)
 - Investigators
 - Investigator Staff
 - Animal Care Staff Basic Read-Only Access
 - Investigator accounts
 - Protocols
 - Emergency Contacts
 - Animal Care Protocol Management
 - Full access to add/modify protocols
 - Manually adjust the number of animals available on protocols.
 - Animal Care Census Management
 - Generate/Transfer cage cards
 - View current census and census histories.
 - Animal Care Animal Order Management
 - View/Approve all current orders
 - View order history
 - Receive animal orders
 - Animal Care Animal Order Receiving Only
 - Receive animal orders
